

# Lockout / Tagout

- 1 Check that the safety switches on your machine guarding are in good working order – report them if they are not.**
- 2 When deep cleaning a machine, always isolate, lock and tag it.**
- 3 Don't undertake a maintenance task without isolating, locking & tagging.**
- 4 Use your lockout and tag checklist and follow the steps carefully.**
- 5 Release pressure and secure objects that can fall from height.**
- 6 Isolate, lock and tag for yourself only.**
- 7 Never give your key to anyone else.**
- 8 Only perform lockout/tagout if you are trained to do so.**
